

Clay Tablet Connector for hybris

Version 1.0.0

Release Notes

February 1, 2016

Overview

Welcome to the Clay Tablet Connector for hybris (Connector). The Connector enables you to automate sending and retrieving content from your hybris CMS, which dramatically reduces the effort required to create, maintain, and publish Web content in multiple languages

How to Contact Clay Tablet Support

Email @: support@clay-tablet.com

Telephone: +1-416-363-0888 option "3"

System Requirements

The Clay Tablet Connector for hybris (Connector) supports hybris versions 5.2 and higher. The Connector has several hybris installation and configuration requirements, described in "hybris Environment Settings" in the *Clay Tablet Connector for hybris Installation and Configuration Guide*.

The Connector requires the MySQL database to store translation data.

The Connector has no additional hardware or software requirements beyond those of hybris. For detailed requirements, refer to the appropriate version of the hybris documentation at <https://wiki.hybris.com>.

Memory	16 GB minimum.
---------------	----------------

Disk Space	<ul style="list-style-type: none">■ Connector installation – 5 GB■ Space for storing log files
-------------------	---

What's New?

- The Connector now uses a Clay Tablet license key to connect to the Clay Tablet License Server.
- The Connector now supports multiple translation providers (LSPs):
 - ▣ You can now select your LSP when you are sending out content for translation.
 - ▣ You can now filter job translation-status by LSP.
- At the start of each interval, the `ctCustomPerformable CronJob`, which downloads and imports translations from the Clay Tablet Platform into hybris, now checks whether it is required to remain active. If it is not required, it de-activates internally. It automatically re-activates when there is a job to retrieve. This behavior conserves resources.
